Dear Colleagues from Belgium and abroad,

The success of the First Belgian Meeting on Fibromuscular Dysplasia, materialized by publication of the minutes as a short review in Hypertension (<http://hyper.ahajournals.org/content/68/4/832.full.pdf?ijkey=D3C20VKK745LXz7&keytype=ref>) and multiple expressions of interest for the BEL-FMD program and the European FMD initiative has encouraged us to prepare this second edition.

Some of the highlights of this year's meeting include presentation of important new studies such as ARCADIA and MEDYA, progress report on genetic study of the disease, the Belgian FMD patient association and the European FMD registry, discussion of the possible links of FMD with carotid and coronary dissection, and review of the imaging and surgical aspects.

We see this meeting as an opportunity for all clinicians and researchers interested by Fibromuscular Dysplasia and related vascular diseases to interact in a creative manner, discuss clinical management and research ideas with the best experts, and disseminate knowledge about the disease in their own countries and institutions.

We look forward to meet you on 10th December 2016.
